Mehdi Aichouch

Magento 2 / Adobe Commerce Developer · Full-Stack PHP

Fès, Morocco · Open to remote, hybrid or on-site · mehdi2002aichouch@gmail.com · +212 699 950 955
linkedin.com/in/aichouch-mehdi · github.com/mehdiaichouch2002 · mehdi-aichouch.vercel.app

Full-stack PHP developer, 3 years on Magento 2 / Adobe Commerce and Laravel. Built B2B and B2C stores for European apparel brands (Carhartt WIP, Anita, Edwin Europe): REST APIs, SSO, Hyvä, performance.

Experience

Freelance Full-Stack Developer · Remote — Aug 2026 – Present

Client projects through agencies, plus a Magento 2 bug-fix service on Fiverr

- Building the online store of a Moroccan home-appliance retailer (via agency J2HB) on Laravel 12 / Bagisto, PHP 8.3, MySQL 8 and Redis: stock management, guest checkout, cash on delivery, MAD pricing.
- Shipped the storefront in French, Arabic (RTL), English and Spanish; wired PayPal with EUR conversion, ready to switch on.
- Migrated the old site's full catalogue (categories, products, prices, images, stock) into seeders, with one-command Docker setup and Pest and Playwright tests in all 4 languages.

Magento 2 / Adobe Commerce Developer · Cartware / Morocommerce, Fès — Jan 2024 – Jul 2026

Full-time permanent contract, ended when the company closed

- Built and maintained features on three Magento 2.4.x stores (Carhartt WIP B2B, Anita, Edwin Europe) serving 50,000+ monthly users, including tiered pricing, catalogue permissions and REST stock sync.
- Designed the REST API of Carhartt WIP's digital asset management app (service contracts, webapi.xml): image data, Amplience CDN URLs, JWT auth; added Microsoft Entra ID SSO with JWKS validation.
- Cut product listing load time from 3.2 s to 0.8 s through Elasticsearch mapping, MySQL indexes, Redis and Varnish; delivered Hyvä storefronts scoring 95+ on Google PageSpeed.
- Created Cartware_Translation, an admin module with CSV import and bulk upsert; patched a MySQL collation error caused by invalid UTF-8 in URL paths; set up Apple Pay on Adyen for Edwin.
- Built the Docker environments for Carhartt B2B and Edwin and rolled out Claude Code with MCP servers (Playwright, MySQL) to the team; legacy refactoring cut production bugs by 45%.

Laravel Developer (Internship) · Cartware / Morocommerce, Fès — Aug – Dec 2023

- Built an internal management platform used daily by 25+ employees (Laravel 10, Tailwind CSS): 15+ REST endpoints and role-based access control, with query tuning that halved response times.

Web Developer (Internship) · Sidi Mohamed Ben Abdellah University, Fès — Mar – Apr 2023

- Built a PHP / MySQL HR app for leave requests and payroll tracking, removing 70% of manual HR work.

Open source

Aichouchm_AttributeImport — Magento 2 module that bulk-imports attribute options and swatches from CSV, with validation preview, ACL and admin log. Composer package, tested on 2.4.6 to 2.4.9.

magento-features — one-command Docker stack for Magento 2.4.9 (PHP 8.5, Nginx, Varnish, OpenSearch, Valkey, RabbitMQ) with GitHub Actions CI and PHPStan level 8.
